PROFESSIONAL SUMMARY

Final-year Business Analytics student (HD average, 83/100) with hands-on experience in outreach, client relationships and data-driven problem solving. At Codrops (2M+ monthly readers), I built the sponsorship pipeline from scratch, qualifying prospects, running personalised outreach and tracking conversions in a structured CRM. As a BDR intern at Sidekick (YC S26), I run targeted outbound in a fast-moving startup environment. Comfortable digging into data to work out why something isn't performing, and fluent in AI tools from hackathon builds to everyday research and personalisation.
